DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: 1) the following species of layering configurations: the species of Figures 1-16, the species of Figures 17A-B, or the species of Figures 18-19. If one of the layering configuration species of Figures 1-16 and 18-19 is elected, then a) the following species of minisheet configurations: the species the Figure 2, the species of Figure 3A, the species of Figure 3B, the species of Figure 8, the species of Figure 9A, the species of Figure 9B or the species of Figure 9C; b) the following species of packaging configurations: the species of Figure 22A, the species of 22B or the species of Figures 23A-B; and c) the following species of attachment configurations: the species of Figure 10A, the species of Figure 10B or the species of Figure 10C.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from 1) and from each of a)-c), if applicable, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 3761

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

For example Applicant might elect the species of Figures 1-16, the minisheet configuration of Figure 2, the packaging configuration of Figure 22A and the attachment configuration of 10D and list the claims readable thereon.

2. A telephone call was made to Mr. Mizumoto on 4-29-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
